

# KOCHUROV ROMAN

## SOFTWARE ENGINEER

Almaty, Kazakhstan / Tomsk, Russia | Telegram: Idnsr | kochurovro@gmail.com |  
<https://github.com/kochurovro>

### SUMMARY

---

A qualified software engineer open to new opportunities and ready for a next career step to grow and extend engineering skills. Proficient in Go, with experience building RESTful services and billing gateways for mobile carriers. Primarily interested in a remote position.

### TECHNICAL SKILLS

---

**Main:** Go, Gitlab CI/CD, PostgreSQL, docker, docker-compose, systemd, Linux, AWS EC2, RabbitMQ, Nginx, Swagger

**Other:** Javascript, Prometheus, Grafana, MongoDB, Python 3, .NETCore 1.0

### PROFESSIONAL EXPERIENCE

---

01-2018 – PRESENT

**Software developer**, LinkIT360 Vostok, Remote

- Created a RESTful API for managing subscription services described through Swagger, with 4M daily transactions and 5M active subscriptions, and a back-end for the accompanying content management system.
- Developed a billing gateway for mobile carriers, including the largest carriers of Pakistan, Russia and Cambodia.
- Introduced the twelve-factor app methodology into the project.
- Built a CI/CD pipeline and a staging environment.
- Worked as a part of a fully remote and highly autonomous team.

05-2017 – 12-2017

**Freelance**, Remote

- Interned for an insurance startup: worked on an Azure storage integration, implemented a migration service using the TDD methodology.
- Built a middleware application to synchronize a social network store with an external store database.

### EDUCATION

---

2012 - 2016

**National Research Tomsk State University**, Tomsk

BSc, Applied mathematics and computer science.
