SUMMARY

Software engineer who is open to any tasks.
And now I'm ready for a next step in my career path. I'm looking for a company that will help my engineering skills further grow and will provide me with adequate challenges. Primarily interested in a remote position but I'm open to all offers.

PROFESSIONAL EXPERIENCE

01-2018 – PRESENT
Software developer, LinkIT360 Vostok, Remote
— Mobile Payments for business
— Work experience in the small team. Tasks in the team are diverse. Role was growing from implementation an non-scalable architecture for new providers to a scalable architecture design. Each new provider was the responsibility of one developer where you need to implement all service stages from development to deployment.
— Technology: Go, Gitlab CI/CD, PostgreSQL, docker, docker-compose, systemctl, Linux, AWS, RabbitMQ, Nginx, Swagger
— https://ww2.linkit360.ru/

08-2017 – 12-2019
